

# New Physiatry Program

## Enhances Patient Care

We're excited to introduce a new physiatry program, led by Dr. Derek Nelson in partnership with Medrina. This program is designed to enhance patient outcomes during the crucial transition from rehabilitation to home.

### Discover the benefits of our in-house physiatrist, including:

- ✓ Regularly scheduled patient visits
- ✓ Closely monitoring the patient as they progress through therapy
- ✓ Meeting with family regarding their loved one's rehabilitation process and what to expect after discharge

Together, let's get patients back to the lives they love. Learn more about our program and how it can make a difference in our patient's rehabilitation journey.

**Call Pam in Admissions at 612-913-5309 for more details and availability.**
